

Rain Barrel

What is this Project?

Master Water Stewards Jacqueline and Meghan installed a rain barrel and a rain chain, which will collect rainwater from the garage roof to use for watering indoor and outdoor plants.

Why Install a Rain Barrel or Raingarden?

This project will reduce the amount of water that runs off this property into stormdrains. Reducing the runoff helps keep our lakes and rivers clean! Everyone plays a part!

Project Details:

- ◆ **Oak rain barrel plus copper rain chain**
- ◆ **Captures a total of 150 gallons of water for every inch of rain!**
- ◆ **Annual gallons of water captured is 3,515 gallons!**
