

# Raingarden

## What is this Project?

Master Water Stewards Amy & Kelsey installed a raingarden at Kelsey's home in Mound. This garden collects rainwater from the roof and garage, preventing it from pooling or running into the street. It has also beautified her lawn and enhanced the communal space her family uses to watch outdoor movies on summer nights.

## Why Install a Raingarden?

This project will keep rainwater on the property, allowing it to soak into the ground rather than run into storm drains, taking pollutants with it. This helps keep our lakes and rivers clean!

## Project Details:

- ◆ **180 sq ft raingarden captures water from 4,218 sq ft of property**
- ◆ **Soaks up about 14,989 gallons of rainwater each year!**
